Applicazione strisce adesive cerchi

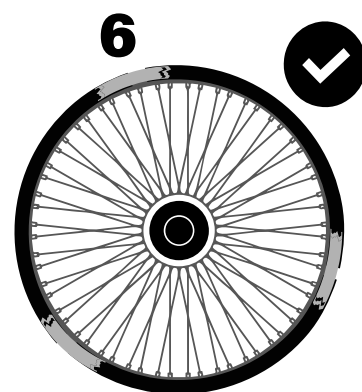

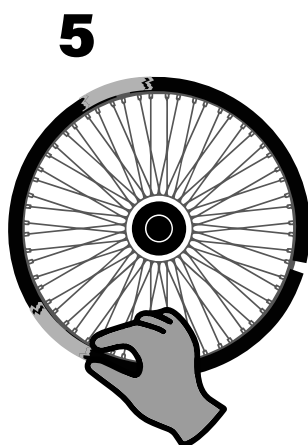

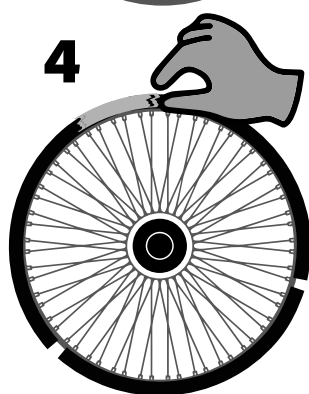

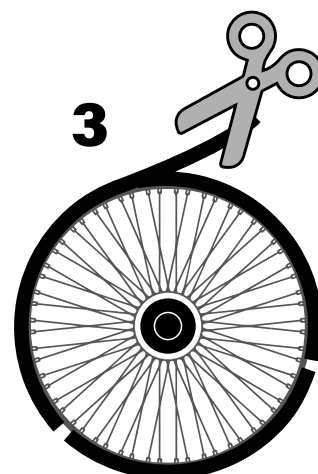

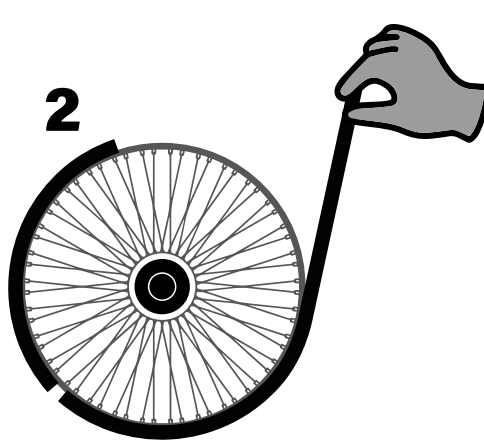

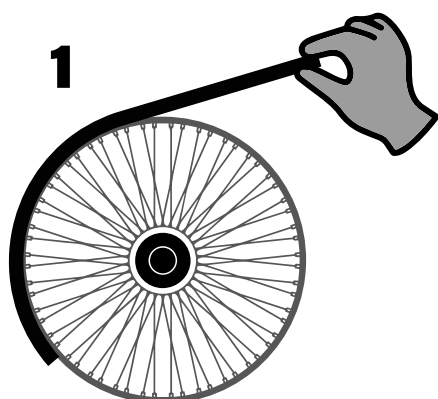

Application of adhesive strips

15"

Pulire bene i cerchi con prodotti neutri. Una volta ben puliti occorre sgrassarli con uno sgrassatore o alcool ed attendere una decina di minuti.

Clean the rims thoroughly with neutral products. Once they are well cleaned, they must be degreased with a degreaser or alcohol and wait about ten minutes.

Non lavare i cerchi per almeno 24 ore dopo l'applicazione ed eventualmente scaldare le strisce (non troppo da vicino) con phon.

Do not wash the rims for at least 24 hours after application and possibly heat the strips (not too closely) with hairdryer.
